Get Started with GitHub

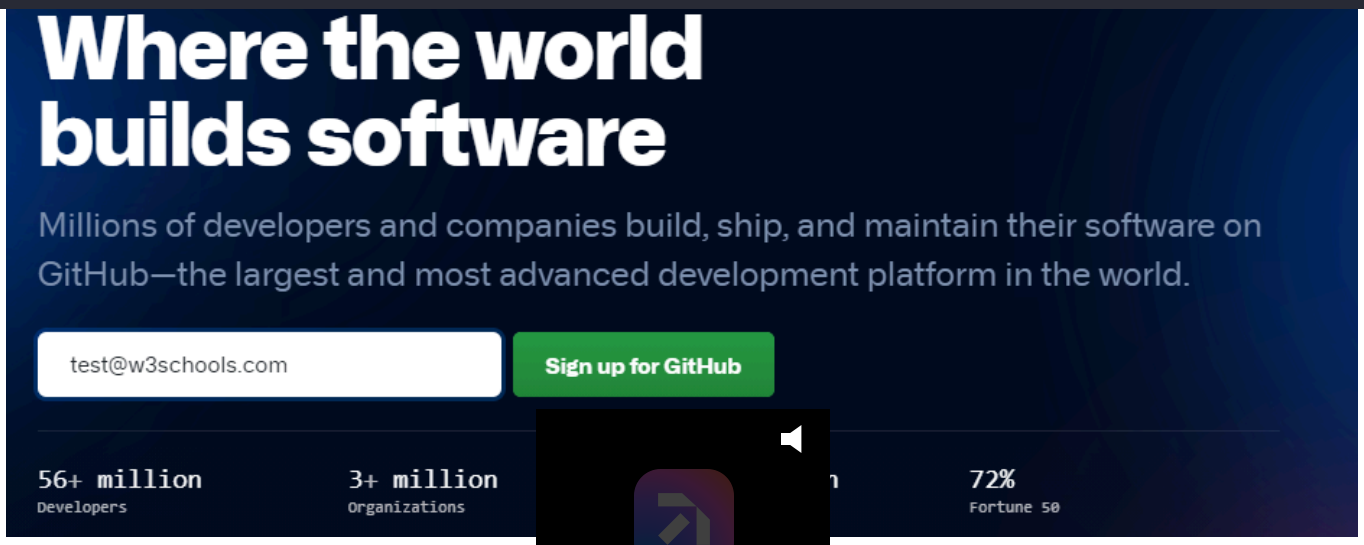

Welcome! This page will guide you through the first steps of using GitHub for version control and collaboration.

1. Sign Up for GitHub

Go to GitHub and create a free account:

Change Platform:
GitHub
Bitbucket
GitLab

Note: Use the same email address you plan to use for your Git configuration.

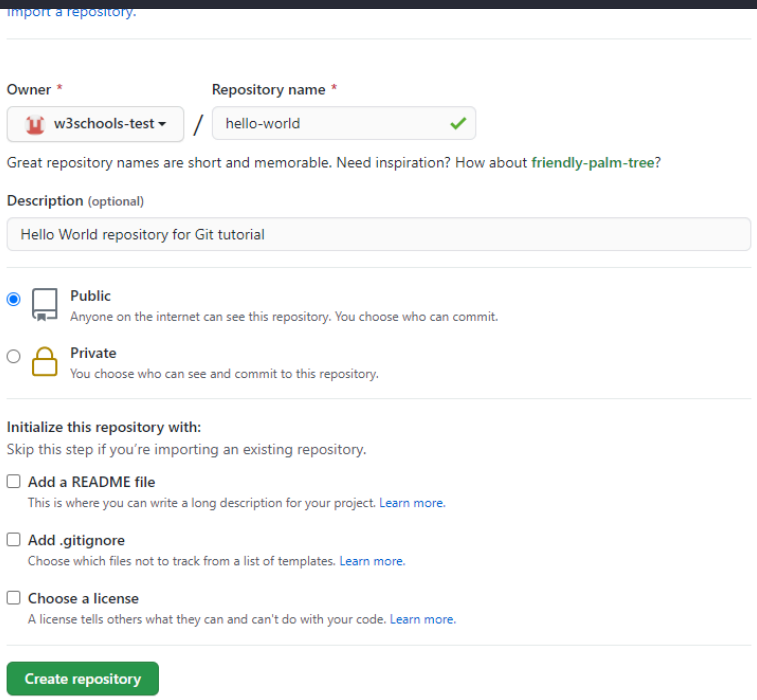

2. Create a Repository

After signing in, click the **New** button to create a new repository:

Fill in the repository details (name, description, public/private, etc.) and click **Create repository**:

3. What is a Remote Repository?

A **remote repository** is a version of your project hosted on the internet. GitHub is a popular platform for hosting remote repositories, enabling you to collaborate with others and back up your code.

Next, you will learn how to securely connect your computer to GitHub using SSH.
