MySQL LEFT JOIN

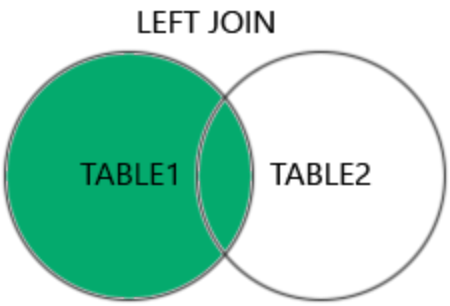

‹ Previous Next ›

MySQL LEFT JOIN

SHARE

The `LEFT JOIN` clause returns **all rows from the left table** (table1), and only the matched rows from the right table (table2).

If there is no match in the right table, the result for the columns from the right table will be NULL.

LEFT JOIN Syntax

```
LEFT JOIN table2
ON table1.condition_column = table2.condition_column;
```

Note: The syntax combines two tables based on a **related column**, and the `ON` keyword is used to specify the matching condition.

Demo Database

Below is a selection from the "Customers" table:

CustomerID	CustomerName	ContactName	Address	City	PostalCode	Cou
1	Alfreds Futterkiste	Maria Anders	Obere Str. 57	Berlin	12209	Gerr
2	Ana Trujillo Emparedados y helados	Ana Trujillo	Avda. de la Constitución 2222	México D.F.	05021	Mex
3	Antonio Moreno Taquería	Antonio Moreno	Mataderos 2312	México D.F.	05023	Mex

And a selection from the "Orders" table:

OrderID	CustomerID	EmployeeID	OrderDate	ShipperID
10308	2	7	1996-09-18	3
10309	37	3	1996-09-19	1
10310	77	8	1996-09-20	2

MySQL LEFT JOIN Examples

The following SQL will select all customers, and any orders they might have:

Example

Get your own SQL Server

```
SELECT Customers.CustomerName, Orders.OrderID
FROM Customers
LEFT JOIN Orders ON Customers.CustomerID = Orders.CustomerID
ORDER BY Customers.CustomerName;
```

Try it Yourself »

Note: The `LEFT JOIN` keyword returns all records from the left table (Customers), even if there are no matches in the right table (Orders).

Tip: To find only the customers who have not placed any order, add a `WHERE` clause to filter for NULL values on the right table:

Example

```
SELECT Customers.CustomerName, Orders.OrderID
FROM Customers
LEFT JOIN Orders
ON Customers.CustomerID = Orders.CustomerID
WHERE Orders.CustomerID IS NULL;
```

Exercise ?

Drag and drop all keywords to make a legal SQL statement

```
[          ] Orders.OrderID, Customers.CustomerName
[          ] Orders
[          ] Customers [          ]
Orders.CustomerID=Customers.CustomerID;
```

FROM SELECT ON LEFT JOIN
