React Getting Started

Previous Next

To use React in production, you need npm which is included with Node.js.

Also, you need to set up a React Environment, and choose a build tool.

Setting up a React Environment

SHARE

First, make sure you have Node.js installed. You can check by running this in your terminal:

```
node -v
```

If Node.js is installed, you will get a result with the version number:

Tutorials Exercises W3Schools app iOS & Android NEW Sign In
. CSS JAVASCRIPT SQL PYTHON JAVA PHP C C++ C# AWS

If not, you will need to install Node.js.

Install a Build Tool (Vite)

When you have Node.js installed, you can start creating a React application by choosing a build tool.

```
npm install -g create-vite
```

If the installation was a success, you will get a result like this:

```
added 1 package in 649ms
```

Create a React Application

Run this command to create a React application named `my-react-app`:

```
npm create vite@latest my-react-app -- --template react
```

If you get this message, just press `y` and press `Enter` to continue:

. CSS JAVASCRIPT SQL PYTHON JAVA PHP C C++ C# AWS

```
Ok to proceed? (y)
```

Next, you might get this message, just press `Enter` to continue:

```
> npx
> create-vite my-react-app --template react

|
*  Install with npm and start now?
|  > Yes /   No
```

If the creation was a success, you will get a result like this:
