React JSX Expressions

‹ Previous Next ›

One of the most powerful features of JSX is the ability to embed JavaScript expressions directly within your markup.

Expressions

SHARE

You can insert any valid JavaScript expression inside JSX by wrapping it in curly braces `{ }`.

React will evaluate the expression and render the result in the DOM.

Example

Get your own React.js Server

Execute the expression `218 * 1.36`:

```
function Car() {
  return (
    <>
```

```
function Car() {
  const hp = 218 * 1.36;
  return (
    <>
      <h1>My car</h1>
      <p>It has {hp} horsepower</p>
    </>
  );
