React JSX If Statements

‹ Previous Next ›

Conditions - if statements

SHARE

React supports `if` statements, but not *inside* JSX.

To be able to use conditional statements in JSX, you should put the `if` statements outside of the JSX, or you could use a ternary expression instead:

Option 1:

Write `if` statements outside of the JSX code:

Example

Get your own React.js Server

Write "Banana" if `x` is less than 10, otherwise "Apple":

```
function Fruit() {
  const x = 5;
```

```
  return (
    <h1>{y}</h1>
  );
}
```

Run Example »

Ad

Option 2:

Use ternary expressions instead:

Example

Write "Banana" if `x` is less than 10, otherwise "Apple":

```
function Fruit() {
  const x = 5;
  return (
    <h1>{(x) < 10 ? "Banana" : "Apple"}</h1>
  );
}
```

Run Example »

Note that in order to embed a JavaScript expression inside JSX, the JavaScript must be wrapped with curly braces, `{}`.

Exercise ?

Complete the ternary expression to show 1 if happy, otherwise 0:

```
function MoodCheck() {
  const happy = true;

  return (
    <h1>
      {          }
    </h1>
  );
}
```

`happy` `?` `:` `1` `0` `if` `else`
